Developing Project Managers

In Partnership With APM Association for Project Management

Our Partnership

BSL has joined forces with the Association for Project Management to bring something truly exclusive to the region. We are proud to be one of the first accredited training providers in Qatar and the Middle East to bring the internationally recognised Project Management Qualification (PMQ) to your doorstep.

This is more than just a milestone; for the first time, professionals in Qatar and the region can access world class APM accredited qualifications locally, gaining the skills and recognition to excel on the global stage.

APM is the only chartered body for the project management profession, offering a pathway for individuals to achieve Chartered Project Professional (ChPP) status. Through this partnership, BSL is opening the door for professionals in Qatar to progress towards internationally respected chartered recognition.

Aligned with the ambitions of Qatar National Vision 2030, this partnership strengthens the country's position as a regional leader in project excellence, empowering individuals and organisations to deliver projects that shape the nation's future.

With BSL, a local Qatari company, the future of project management in the Middle East starts here.

APM
Project Management Qualification

The APM Project Management Qualification (PMQ) is a globally recognised qualification designed for those with existing project management experience who wish to formalise and extend their knowledge. The course covers the full project lifecycle, from initiation and planning through to delivery, governance, risk and benefits management.

Learners will develop the skills to manage projects confidently and effectively, making a tangible impact on organisational success. The PMQ equips professionals with the knowledge and tools to lead projects, make informed decisions, and apply best practice in a structured and consistent way.

Delivered face to face by BSL in Qatar, this qualification combines practical exercises, case studies and interactive learning to ensure participants can apply what they learn directly to real world projects. It also provides a clear pathway towards further professional recognition, including Chartered Project Professional (ChPP) status through APM.

Why Train with BSL and APM?

- Global recognition

- Our qualification offers global credibility, recognition and validates expertise. This develops individuals and their organisations reputation, opens doors to new opportunities, and builds trust with clients and peers through external validation of skills.

- Networking opportunities: Joining a community of Project Professionals provides valuable networking opportunities allowing you to connect and collaborate with like-minded professionals in the field.

APM Project Management Qualification Syllabus

Setting up for success

- Life cycles: Understand linear, iterative, and hybrid models, their stages, uses, and adaptations.
- Governance: Know roles, responsibilities, and how governance supports organisational goals.
- Sustainability: Balance environmental, social, and economic factors; monitor performance.
- Business case: Justify investment, assess value, and maintain alignment with benefits and risks.

Preparing for change

- Procurement: Plan strategies, select suppliers, negotiate, and manage contracts effectively.
- Reviews: Use structured reviews to assess progress, inform decisions, and adjust plans.
- Assurance: Provide confidence that project objectives, processes, and standards are met.
- Transition management: Plan and manage the move of outputs into business-as-usual.
- Benefits management: Identify, plan, track, and realise benefits aligned with strategy.

APM Project Management Qualification Syllabus

People and behaviours

- Stakeholders & communication: Analyse, engage, and communicate to build relationships and manage expectations.
- Conflict resolution: Identify, understand, and resolve disputes constructively.
- Leadership: Motivate and inspire teams; adapt leadership style to context and individuals.
- Team management: Build, develop, and support effective, collaborative project teams.
- Diversity, ethics & professionalism: Promote inclusion, act ethically, and uphold standards and competence.

Planning and managing deployment

- Requirements & solutions: Define, prioritise, and deliver solutions that meet agreed needs.
- Quality & integrated planning: Plan, assure, and manage quality within an integrated project plan.
- Schedule & resources: Create realistic timelines, allocate resources, and optimise performance.
- Budgeting & cost control: Estimate, monitor, and manage financial performance.
- Risk, issues & change control: Identify, assess, and control risks, issues, and change systematically.

Why Invest in Your Teams Project Management Qualifications?

Developing project management capability is one of the most effective ways to drive business performance. By supporting your team to achieve the APM Project Management Qualification (PMQ), your organisation is equipping them with internationally recognised skills that directly impact delivery, efficiency, and client satisfaction.

How your business benefits:

- Enhanced delivery outcomes: trained project managers are better able to plan, control, and deliver projects on time and within budget.
- Consistency and best practice: staff learn a common professional language and approach, reducing misunderstandings across teams and improving collaboration.
- Increased client confidence: holding APM qualifications demonstrates commitment to global standards and builds trust with customers and stakeholders.
- Talent retention: investing in people shows your organisation values professional growth, helping you attract and retain high quality staff in a competitive Middle Eastern market.
- Scalable impact: with up to 10 delegates per course, the knowledge and capability gained can spread across departments, creating a stronger culture of project excellence.

From Project Management to Strategic Leadership

Your APM accredited training is the foundation of professional excellence. To move beyond project delivery and make a lasting strategic impact, BSL offer an extensive range of leadership programmes designed to enhance capability, nurture talent, and prepare individuals to lead high-performing teams across a variety of industries.

Our Leadership programmes support experienced project professionals and managers ready to expand their influence across the wider organisation. Each programme blends practical tools with reflective learning, ensuring participants not only manage projects successfully but successfully lead, shape culture and drive strategy.

Programmes include:

- Leadership Essentials: Develop a deeper understanding of organisational dynamics, systems thinking and strategic decision making.
- Leading Through Change: Learn to guide teams through transformation with clarity, resilience and empathy.
- Influence and Stakeholder Leadership: Strengthen your ability to manage complex relationships, communicate vision and inspire collaboration.
- Executive Leadership: Designed for senior leaders, this course explores high level strategy, innovation and performance in complex environments.

Each course builds on your project management foundation, helping you transition from managing delivery to leading direction. Together, they form a pathway that enables you to align operational excellence with strategic vision
